Keller Agricultural Fair.

On the 27th inst. this old landmark of home industry, home effort and home advancement will open with added attractions far beyond any preceding fair yet held on the grounds of the association. The board of managers have well borne in mind the importance of advanced efforts and requirements, in order to meet the public expectation, and have bestowed special attention to each department of usefulness, that all may profit by the exhibits.
The Ladies Department for this year will be on a broader and more attractive scale than ever before, in all the domestic wants of the home by which life may be made happier by added comforts to every want of domestic life—a province so essentially the part of woman in our national economy, and for which the association does recognize a debt of gratitude for the great help that the ladies have always given to advance our agricultural effort by their decided skill and handicraft.
The exhibit of farm products will be up to, and we hope beyond any of those heretofore made, a matter so essential to our agricultural advancement and consequent prosperity of our people. So in visiting our grounds the very first matter of importance to the visitor should be to learn "what new varieties." It is the new varieties that we have in thirty years of life laid before and to the attention of our farmers that has so measurably brought about our high standard of agricultural thrift.
Poultry exhibit, including the best varieties of the feathered tribe for egg producing qualities for the table or for the "early to the nest," for the propagation of those broods that can be marketed early, and which means best price.
No one may expect to be disappointed in our stock exhibit. We promise to show you animals of superior grade, standard, and breed second to none to be found anywhere within the confines of our state. We are assured that our speed department will be an entertaining feature of our exhibits and one, of course, the board of managers have not failed to overlook, as one of the first importance to the success of the fair, as well as most enterprising and enjoyable to so large a portion of our people, both men and women. You may therefore expect to witness fine racing and to see the horse in all his beauty on exhibit.
Thirty years ago a few enterprising citizens of Eastern Shore conceived the needs and wants of an agricultural exhibit, that should include every branch of local industry, and of the handicraft of art. Thus the association was formed.
And that in every material advancement of agriculture, our true base of wealth, we have been and do claim that we have been of inestimable benefit to the best interest of the people, and in the language of some past sage "caused two blades of grass to grow where but one grew before."
It is therefore the duty of one and all to visit our fair and to do all in their power to advance its interest, which, as a fact, will be but advancing their own.

Letter to Ben T. Gunter.
Accomac, Va.
Dear Sir: Josh Billings never said anything truer than this: "success does not consist of never makin blunders, but in not makin the same wun twis".
N. R. Watkins, of Lott, Texas, had his house painted some years ago, and it took 12 gallons of what he believed to be paint; he bought it for paint, and it looked like paint, the painter said it was paint.
He has had it painted again; it took 7 gallons of Devco.
It cost \$85 before; now \$35.
He knows it is painted now, and he's got that \$30 in a safe place. He's got his knowledge in a safe place too.
Yours truly,
F. W. Devco & Co.
